

Atlanta Public Schools

# Postsecondary Enrollment Trends

2012 - 2022

ATLANTA PUBLIC SCHOOLS

**DATA + INFORMATION GROUP**

*We dig data.*

Updated March 2023

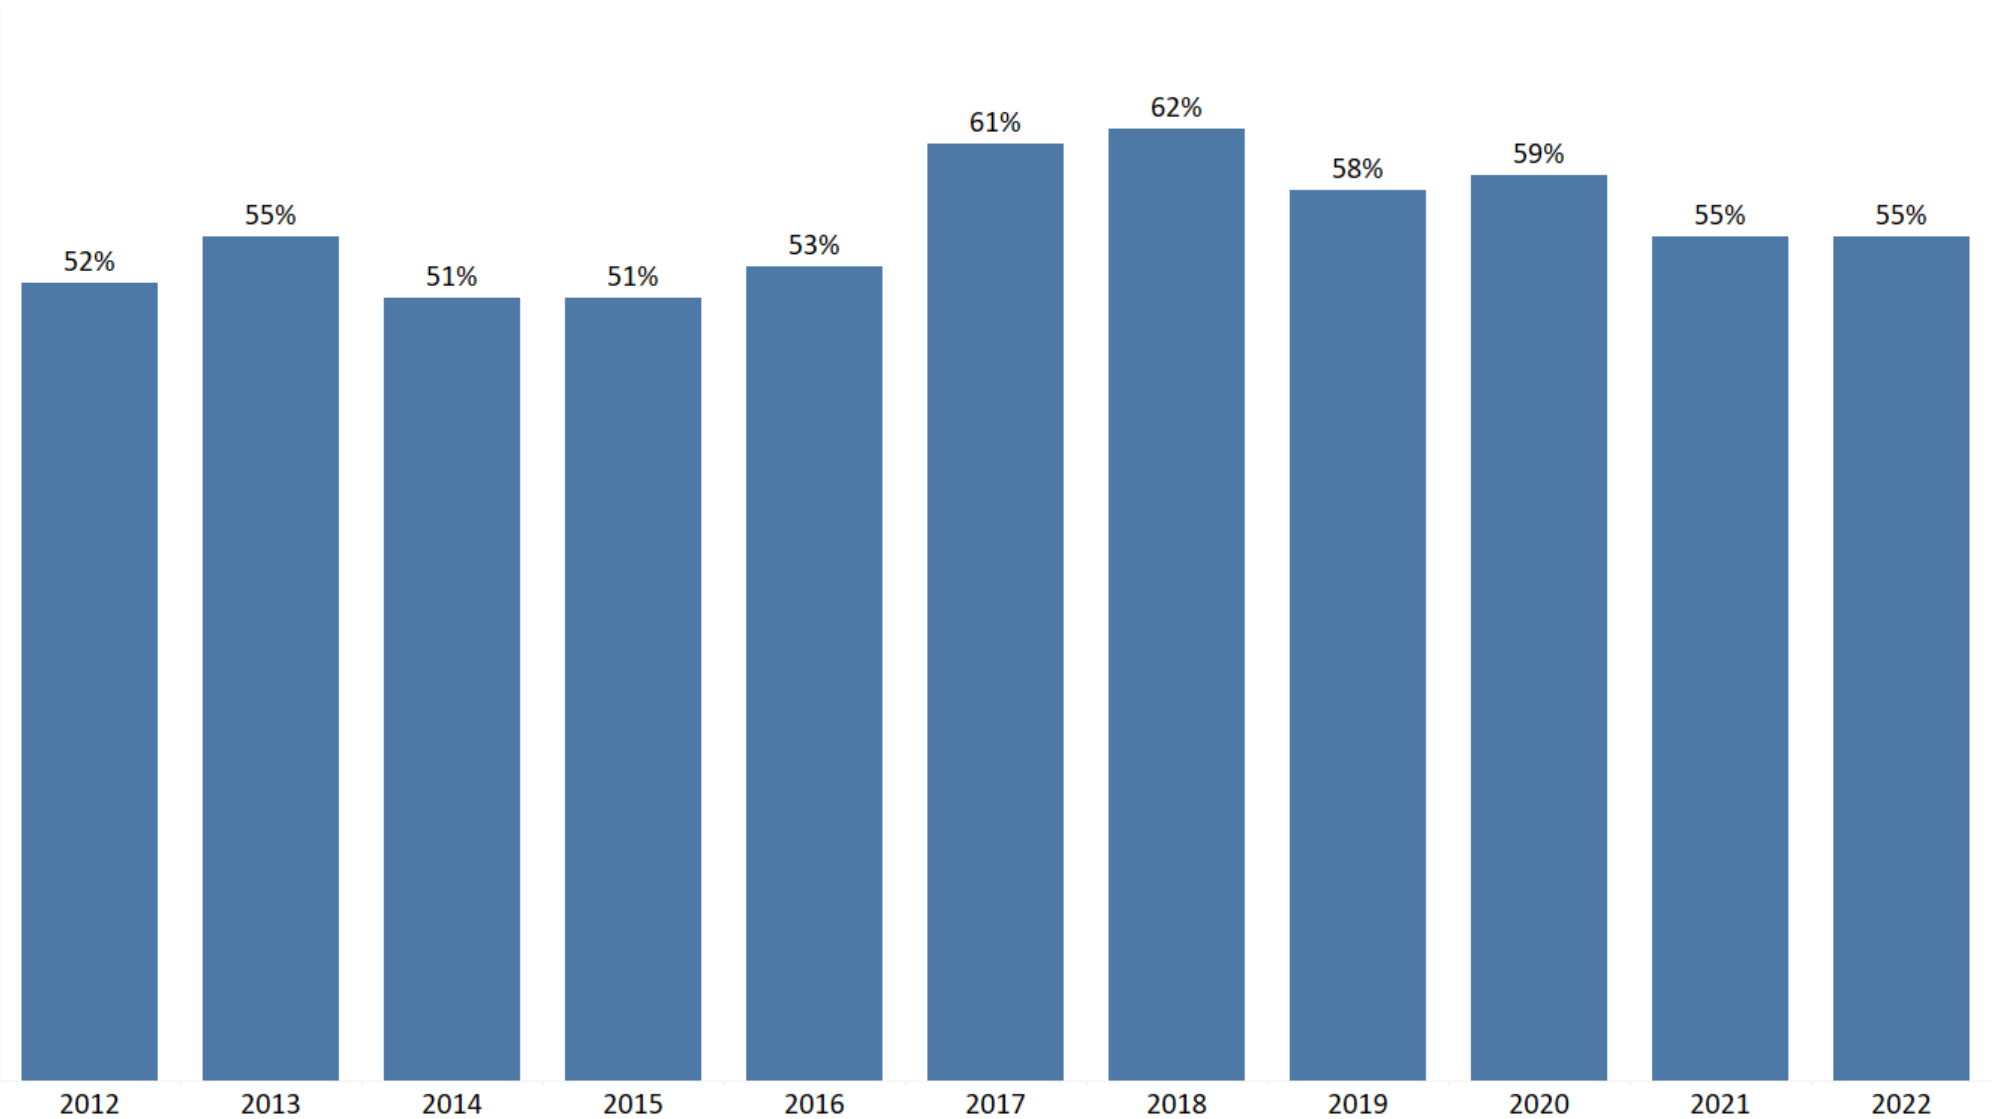

## 2022 Background Information

In March of 2020, the global COVID-19 pandemic altered life for everyone. The 2022 graduating cohort attended high school during the pandemic; it is important to note that the pandemic may have influenced their postsecondary admissions credentials and postsecondary decisions. It is also important to note that the pandemic may have affected members of earlier cohorts in terms of their ability to complete a postsecondary credential or stay enrolled in a postsecondary institution. This report cannot account for the potential impact of the pandemic on postsecondary enrollment trends.

## Introduction

This report examines college enrollment and persistence of Atlanta Public School (APS) graduates since 2012. It focuses on "seamless enrollment" of each graduating cohort as defined by the Center for Education Policy Research at Harvard University. Seamless enrollment means a student enrolled in a postsecondary institution by October 1<sup>st</sup> following their high school graduation. Enrolled students who disenroll before October 1<sup>st</sup> are not counted as seamless enrollees. Seamless enrollment encompasses both full-time and part-time enrollment. Information about National Student Clearinghouse (NSC), the source of the postsecondary enrollment data, can be found at the end of this report. Fifty-five percent of cohort 2022 on-time graduates were enrolled in 2- or 4-year institutions as of October 1, 2022.

APS Seamless Enrollment by Cohort

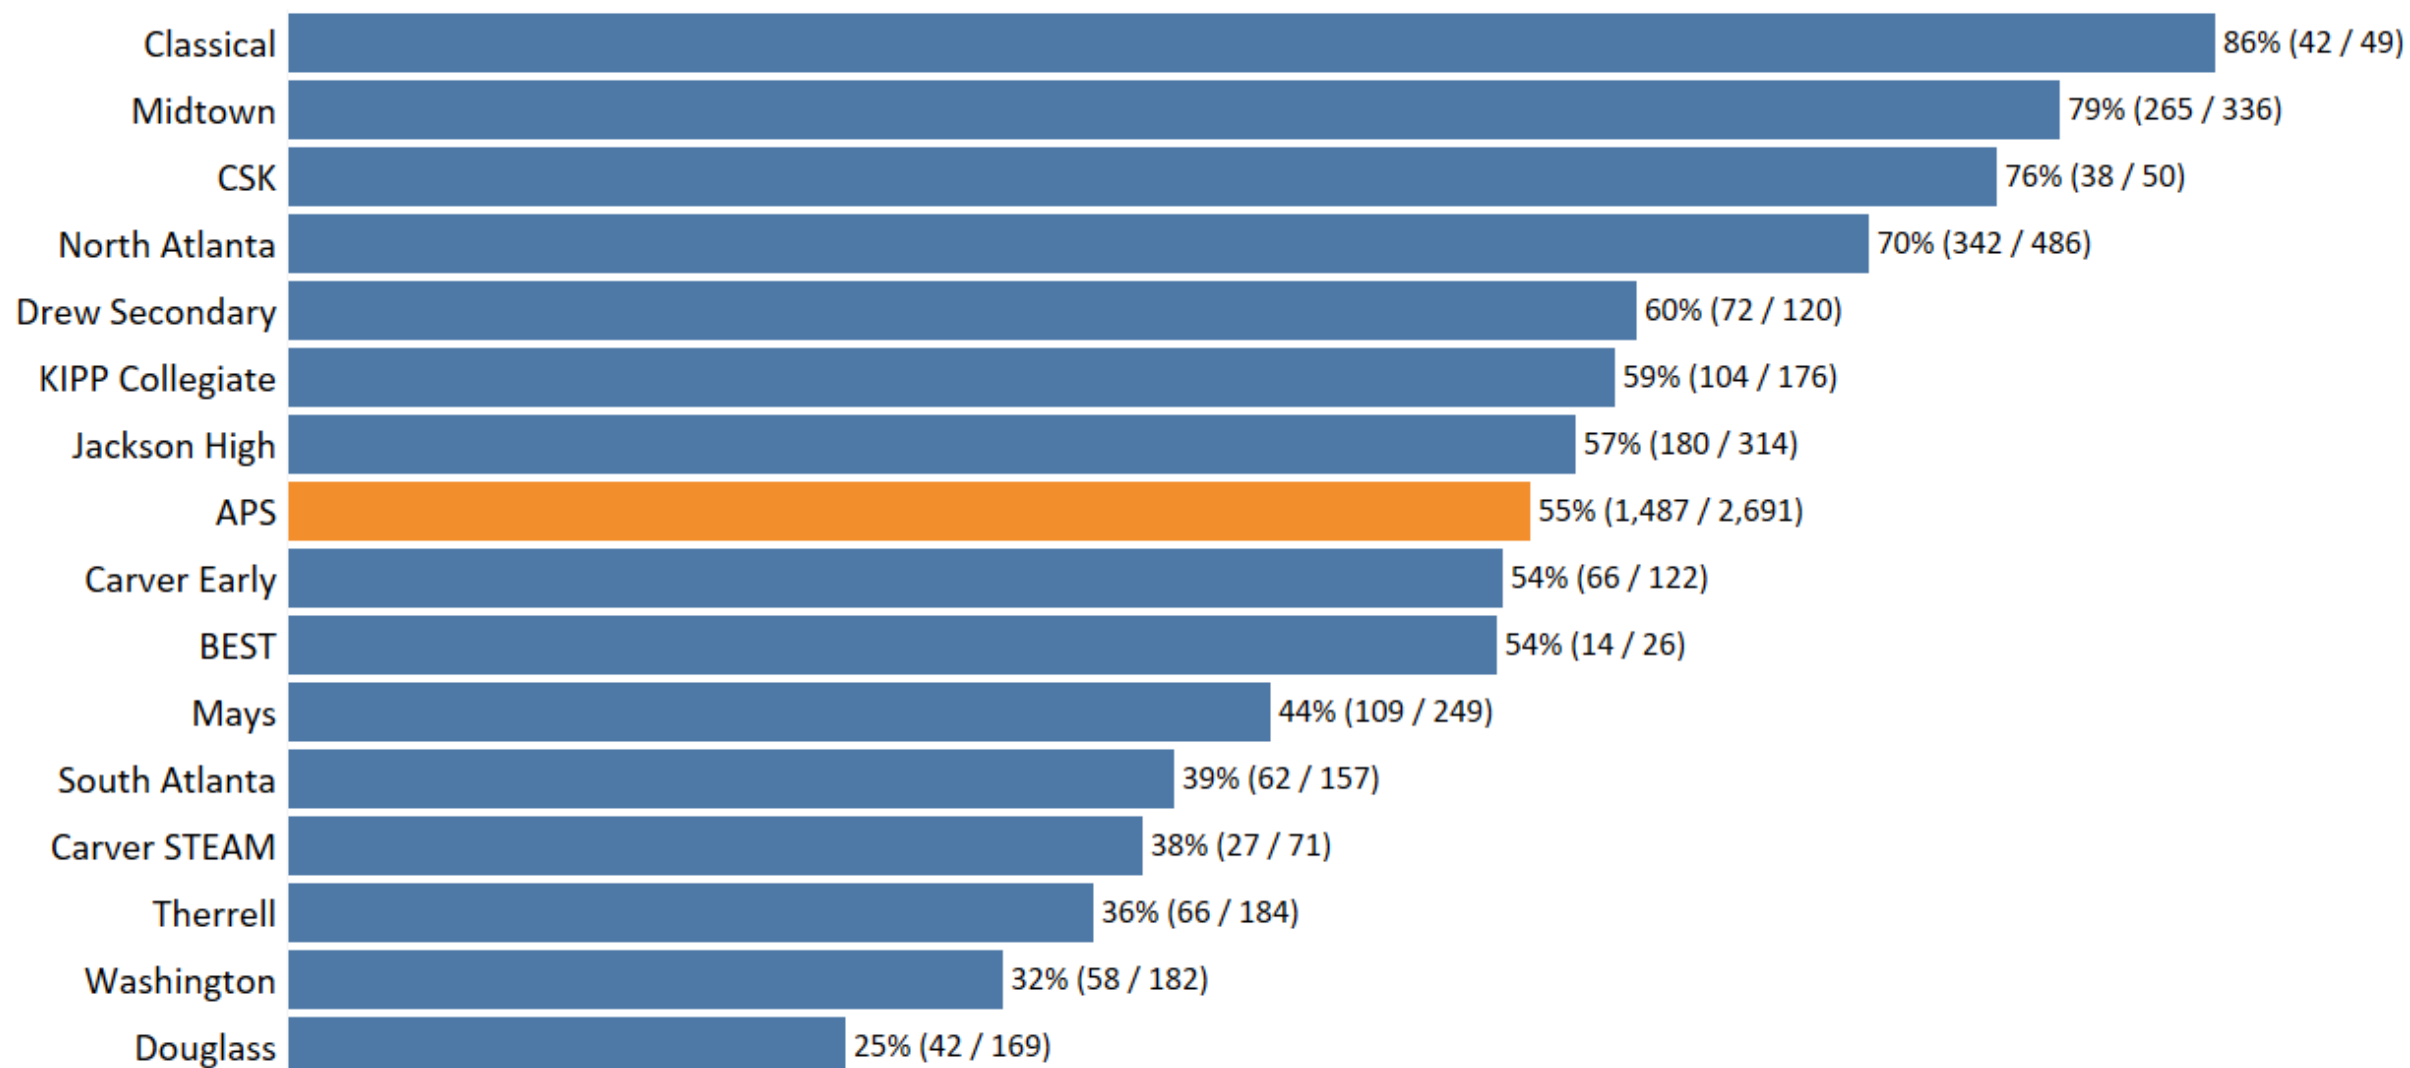

Note. On-time graduates refers to students who graduate in four years with a regular high school diploma as reported by the Georgia Department of Education. Seamless enrollment rates for earlier cohorts (before 2022) were not updated. Percentages were rounded to the nearest whole number.

## 2022 postsecondary enrollment rates varied by high school

In 2022, there were substantial differences across high schools in seamless postsecondary enrollment rates. Classical had the highest seamless enrollment rate (86%), followed by Midtown (79%) and CSK (76%). Douglass (25%), Washington (32%), and Therrell (36%) had the lowest seamless enrollment rates.

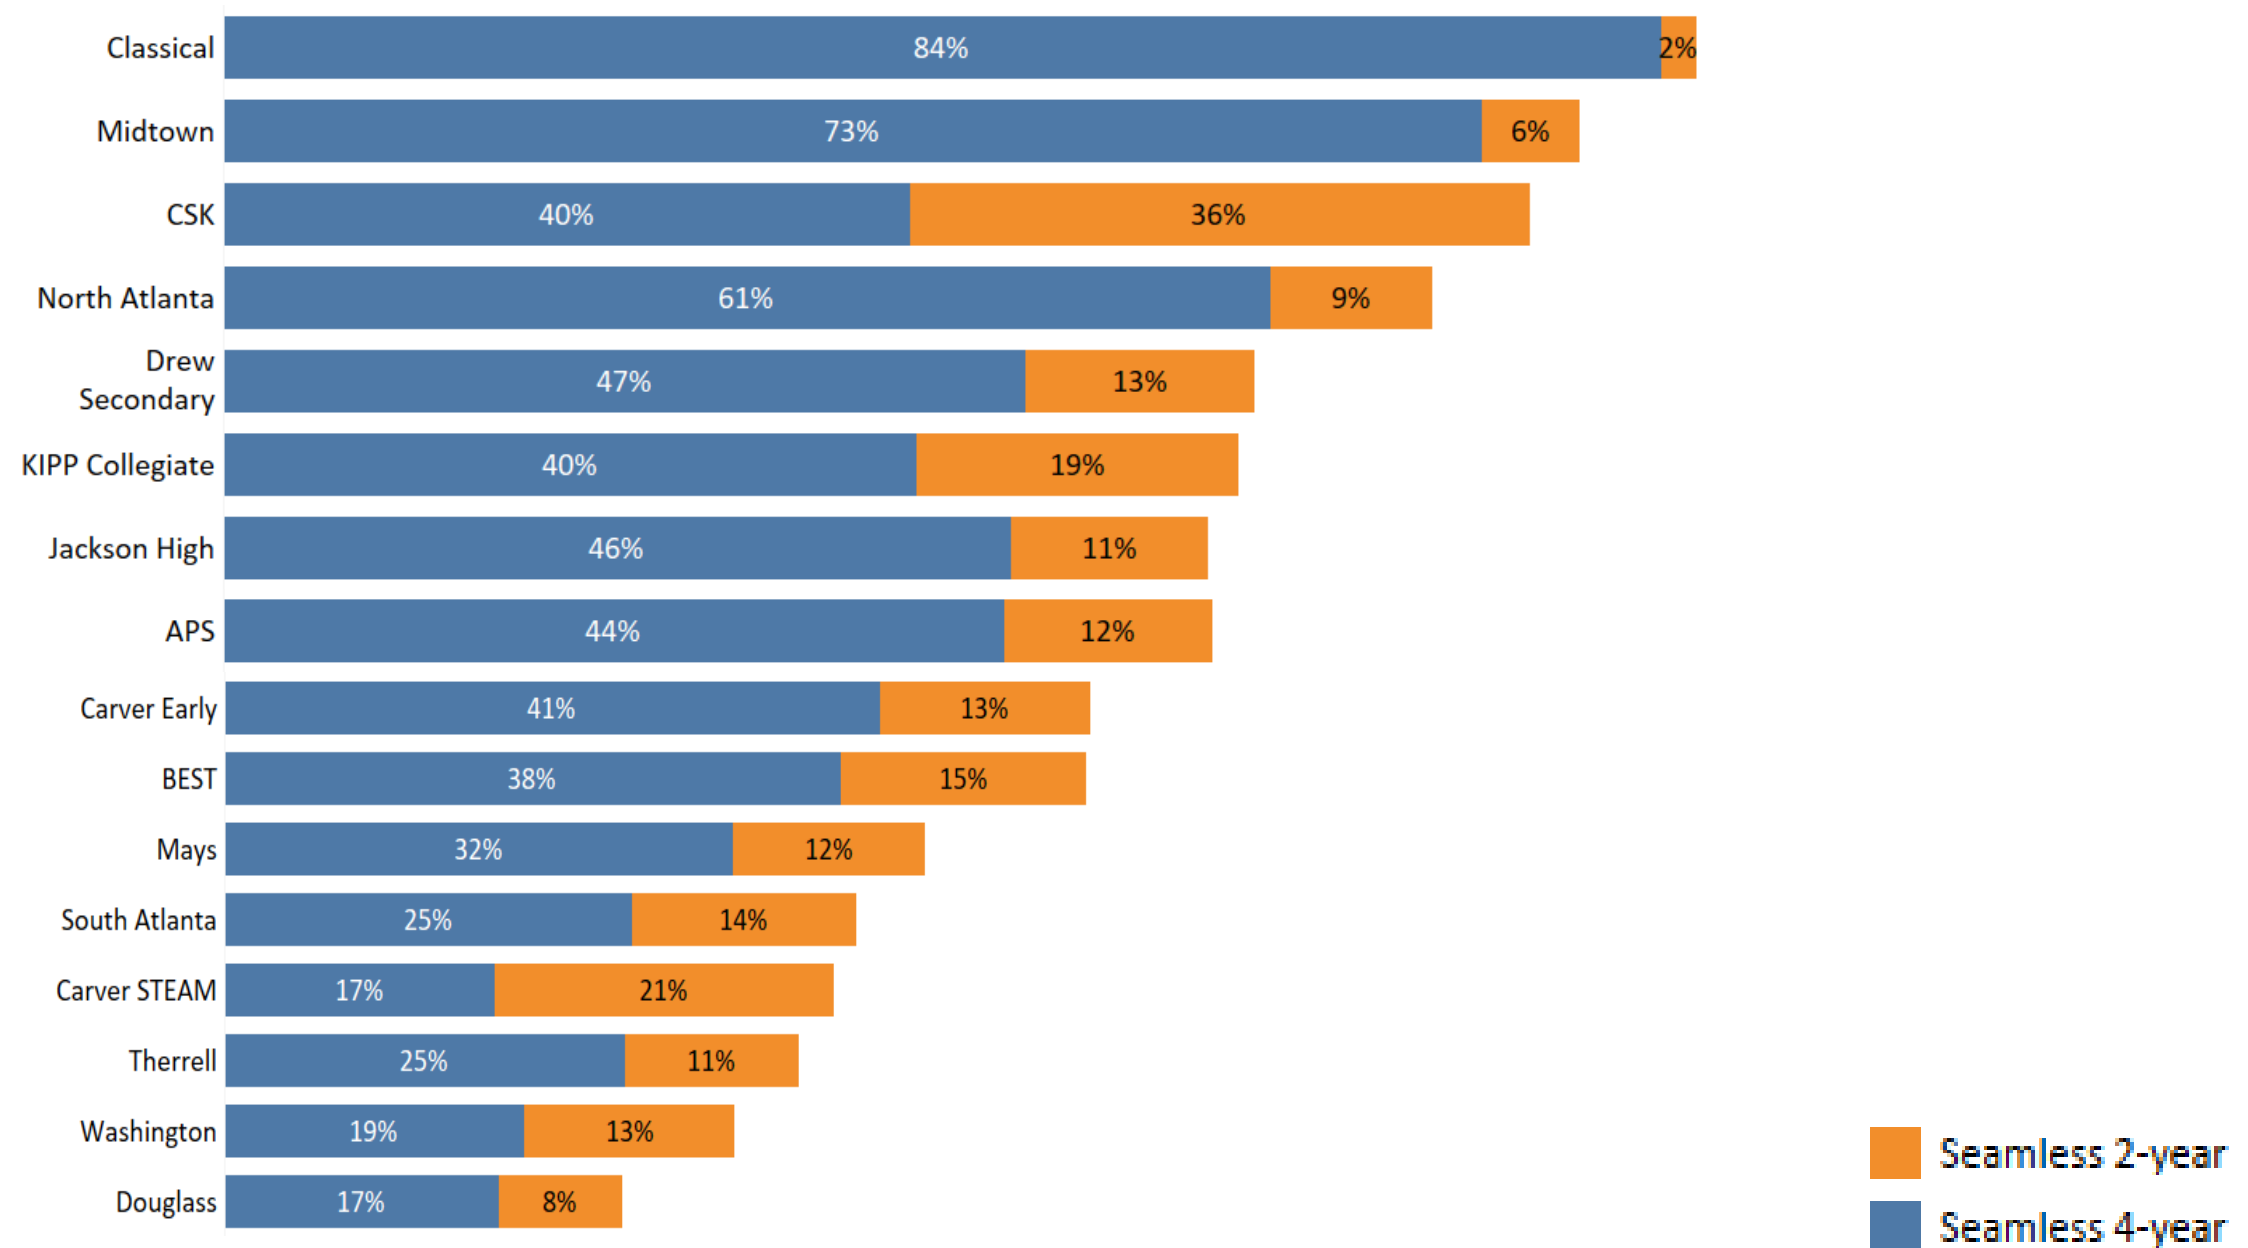

### Cohort 2022 Seamless Postsecondary Enrollment by High School

Note. The denominator in the parentheses is the number of on-time graduates and the numerator is the number of seamless enrollees. Percentages were rounded to the nearest whole number.

## The majority of 2022 seamless college enrollees went to four-year colleges

Districtwide, about 12% of cohort 2022 graduates enrolled at institutions that predominantly grant 2-year degrees, compared to 44% enrolling at institutions that predominantly grant 4-year degrees. The proportion of graduates enrolling in 2-year institutions varies widely by high school. Classical had the highest proportion of its cohort 2022 on-time graduates that seamlessly enrolled in 4-year institutions. Carver STEAM had the highest proportion of its on-time graduates that seamlessly enrolled in 2-year institutions.

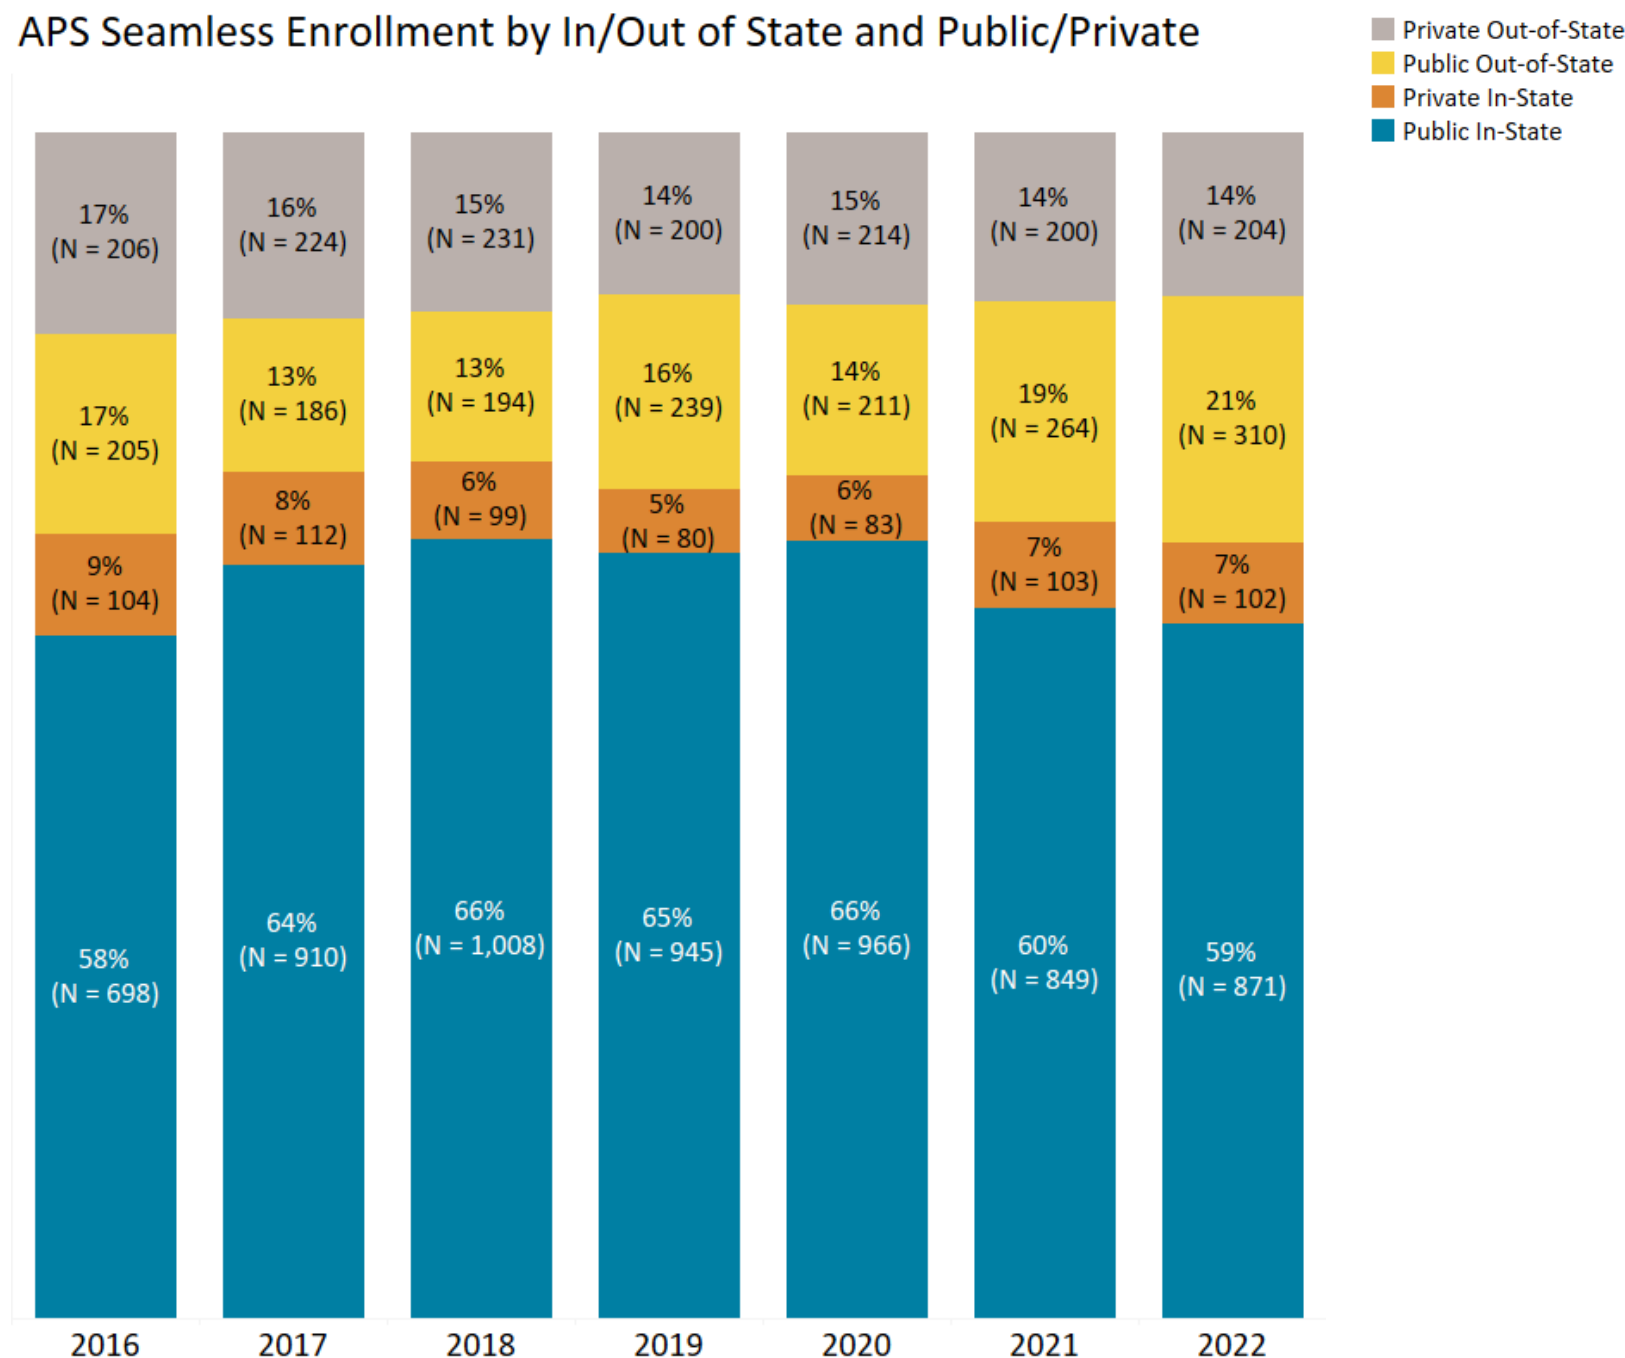

Notes. College classification uses U.S. Department of Education College Scorecard data (predominant degree type). The “2-year” classification includes any institutions that predominantly grant certificates or associate degrees. Due to rounding, the two percentages listed for the district and each school might not sum to the percentage listed in the previous slide.

## The majority of APS seamless college enrollees attend public institutions within Georgia

Since 2016, more than half of all seamless college enrollees from APS enrolled within in-state public institutions. The percentage of students enrolling at public out-of-state institutions increased slightly compared to last year, while the percentage of students enrolling at public in-state institutions decreased slightly. More cohort 2022 students attended Georgia State University than any other institution.

APS Seamless Enrollment by In/Out of State and Public/Private

## Postsecondary enrollment rates vary across student racial/ethnic groups

From SY2016 to SY2022, Black, White, Asian, Hispanic, and Multiple/Other on-time graduates seamlessly enrolled in postsecondary institutions at different rates. White and Hispanic students seamlessly enrolled at lower rates in 2022 than in 2021. The seamless enrollment rate for Asian and Multiple/Other students increased slightly in relation to 2021. The seamless enrollment rate for Black students remained essentially constant from 2021 to 2022.

APS Seamless Enrollment Rates by Race/Ethnicity, Cohort 2016 - 2022

Seamless Enrollment by Race/Ethnicity, Cohort 2022

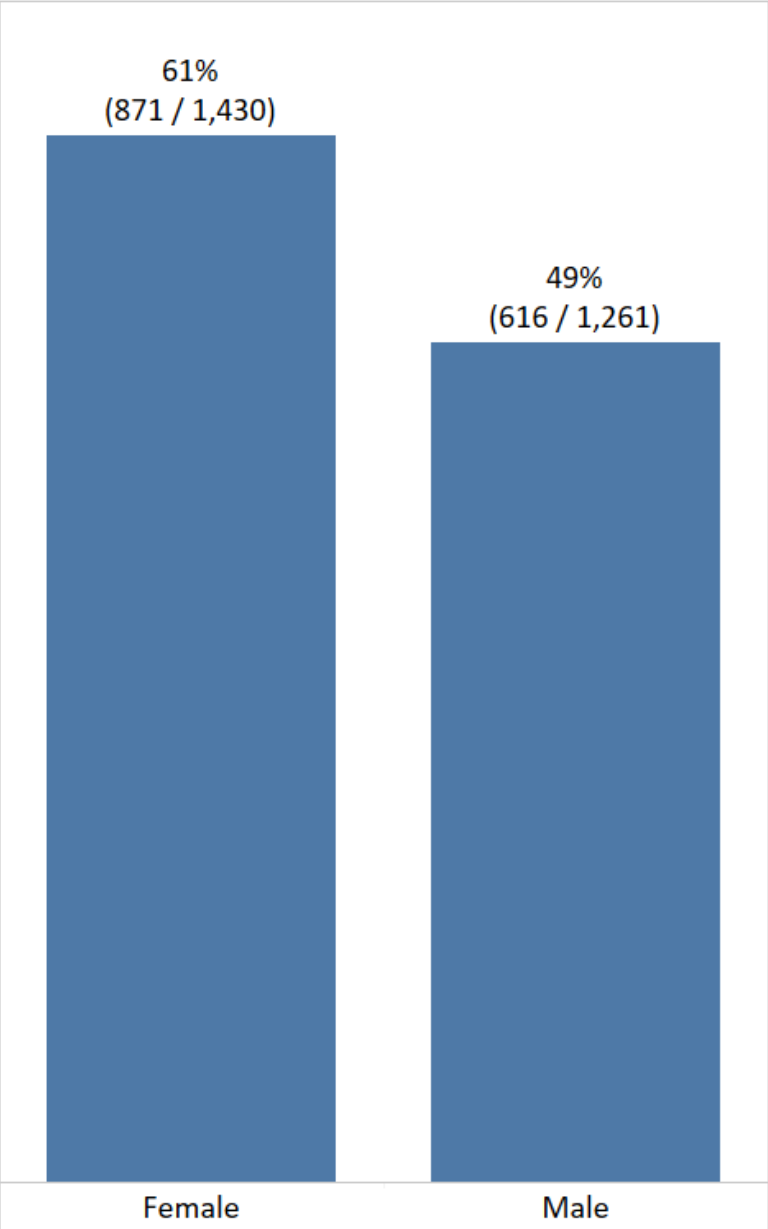

Notes. In the **APS Seamless Enrollment Rates by Race/Ethnicity, Cohort 2016 - 2022** graph, the percentage and n size (number of seamless enrollees) reflect Cohort 2022. In the **Seamless Enrollment By Race/Ethnicity, Cohort 2022** graph, the numerator in the parentheses is the number of seamless enrollees and the denominator is the number of on-time graduates. Racial/ethnic groups with less than ten SY2022 on-time graduates were excluded. Percentages were rounded to the nearest whole number.

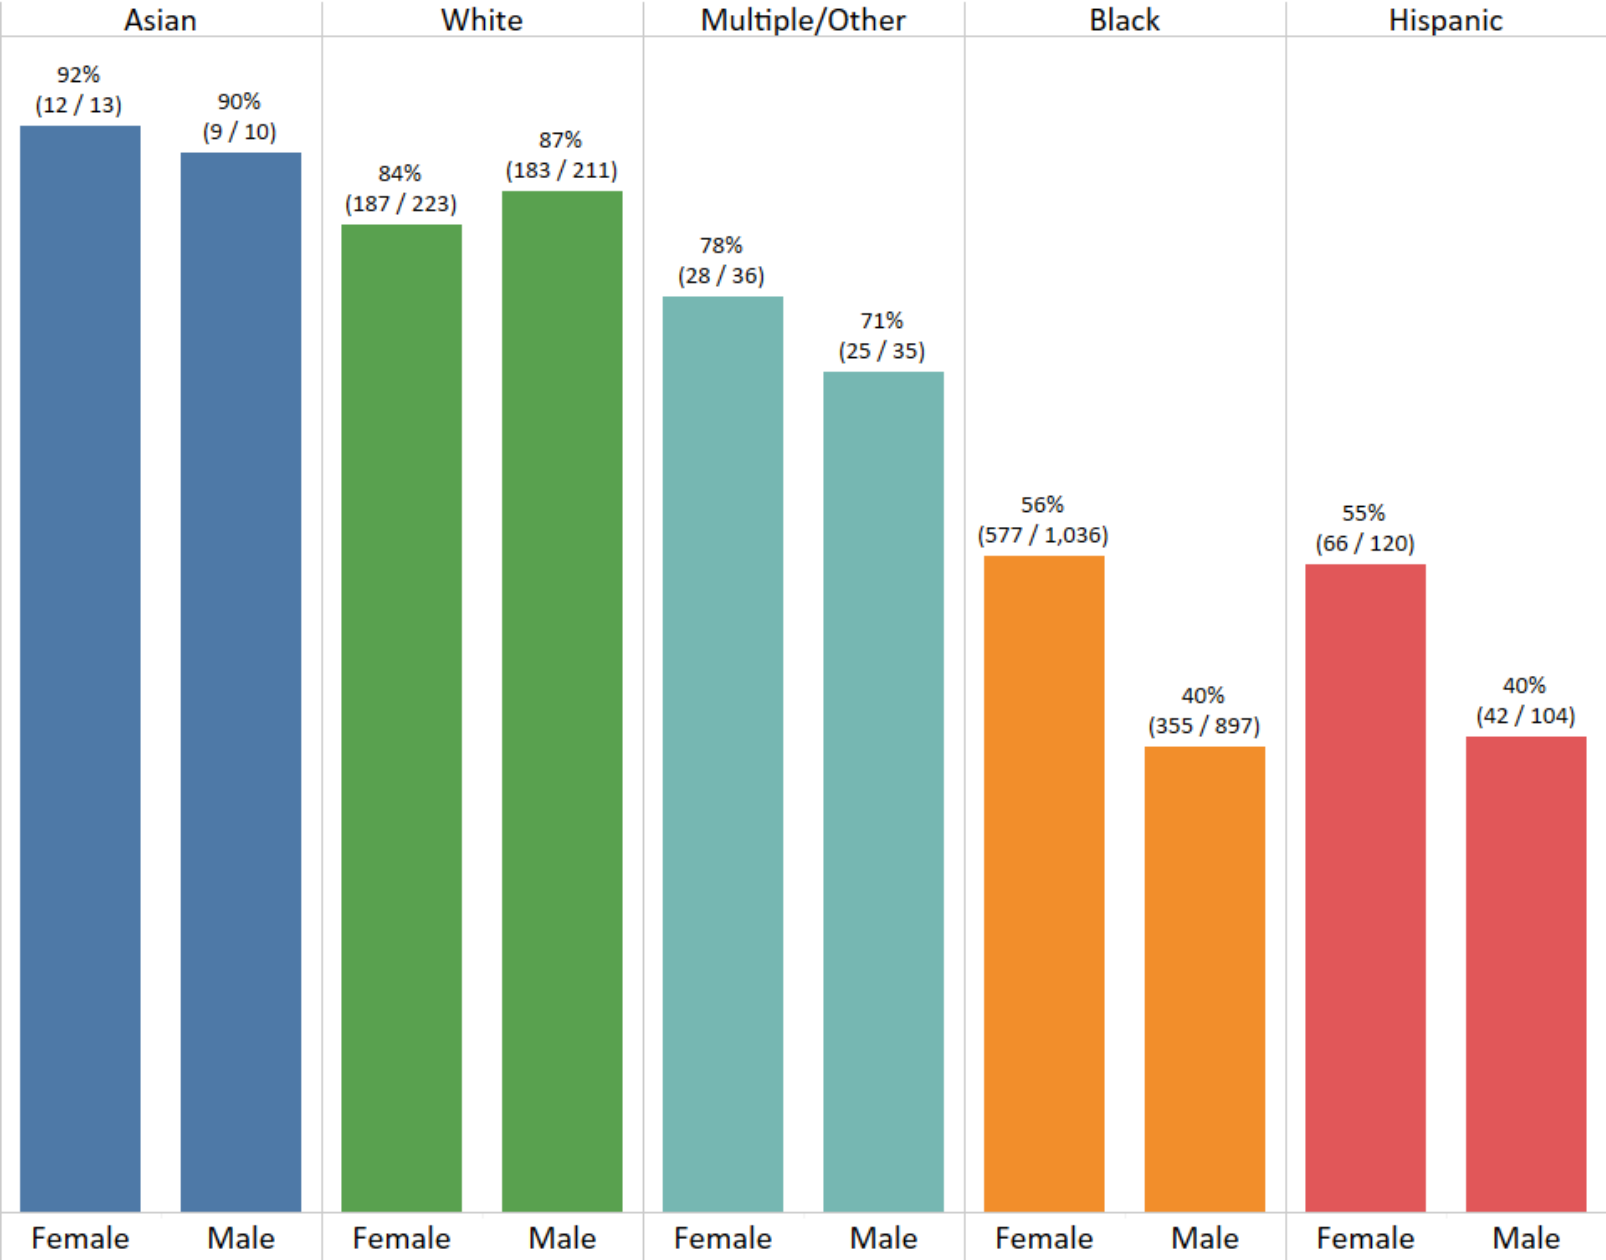

# Postsecondary enrollment rates vary by gender and by gender within racial/ethnic groups

The left graph shows that a higher percentage of Cohort 2022 female students seamlessly enrolled in postsecondary institutions in relation to male students, with 61% of on-time female graduates seamlessly enrolling compared to 49% of on-time male graduates. This gender difference is more pronounced among Black and Hispanic on-time graduates and less pronounced among Asian and Multiple/Other on-time graduates. A slightly higher percentage of White male on-time graduates seamlessly enrolled compared to White female on-time graduates.

Enrollment by Gender, Cohort 2022

Enrollment by Race/Ethnicity and Gender, Cohort 2022

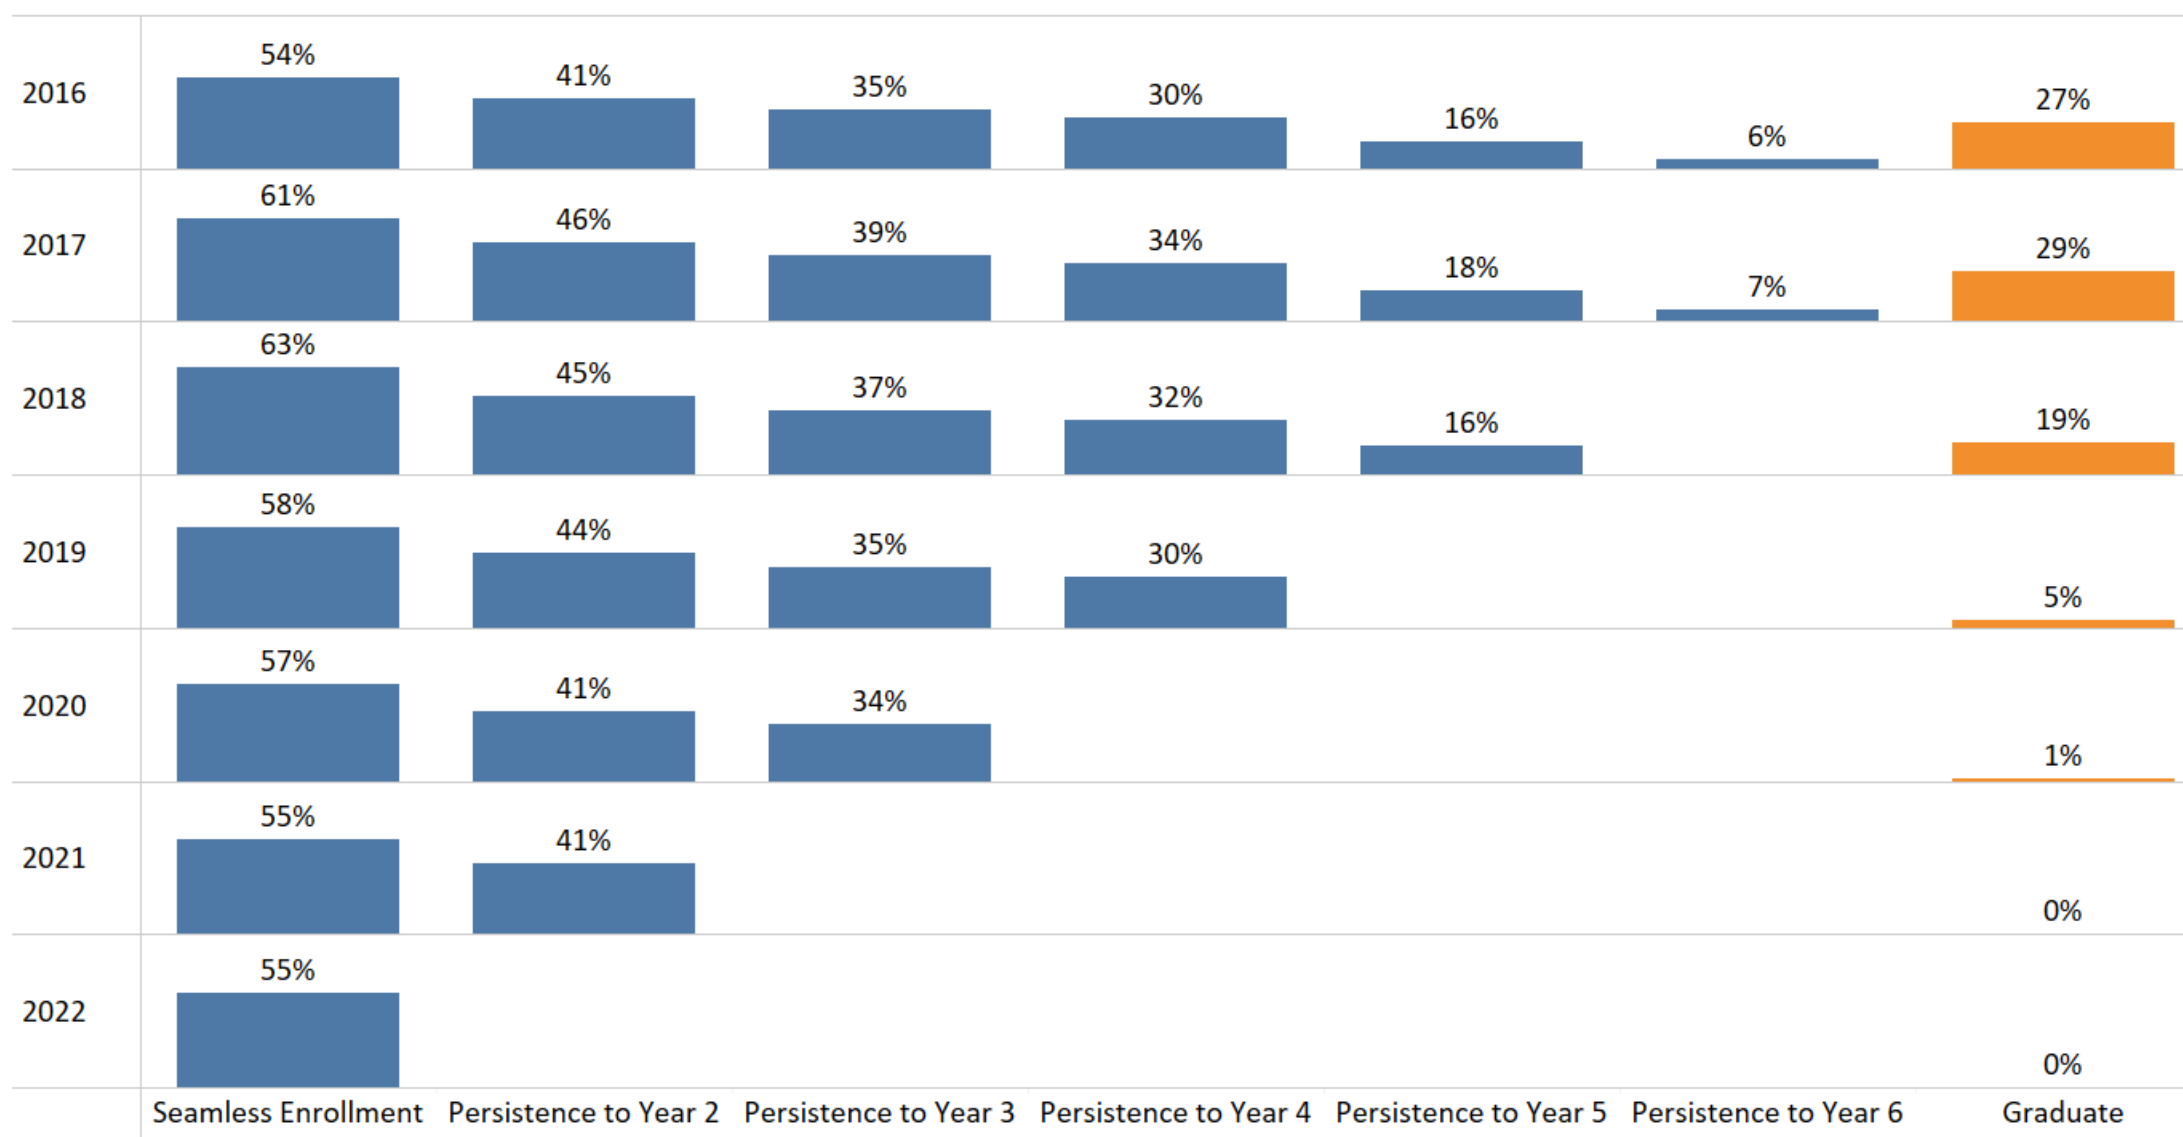

Notes. Racial/ethnic and gender groups with less than ten on-time graduates were excluded. Cohort 2022 refers to students who graduated in 2022 and not to the cohort assigned in the ninth grade. In both graphs, the numerator represents the number of seamless enrollees, and the denominator represents the number of on-time graduates. Percentages were rounded to the nearest whole number.

## The percentage of APS graduates seamlessly enrolling was constant from 2021 to 2022

The percentage of APS graduates seamlessly enrolling remained consistent from 2021 to 2022. Cohort 2017 had the highest persistence rate to year 2 in relation to the other cohorts. Cohort 2016 is the only cohort represented in the graph in which its members have had six complete school years to graduate. In this graph, the percentage of students who persisted in each year and graduated only includes students who seamlessly enrolled. Students may count in both persistence and graduate figures. For this analysis, college persistence is defined as remaining enrolled in a postsecondary institution as of October 1 in years following initial enrollment. A student need not remain enrolled in the same institution to count as persisting; however, s/he must remain enrolled continuously (as of October 1 in consecutive years).

Seamless College Enrollment and Persistence of APS On-Time Graduates

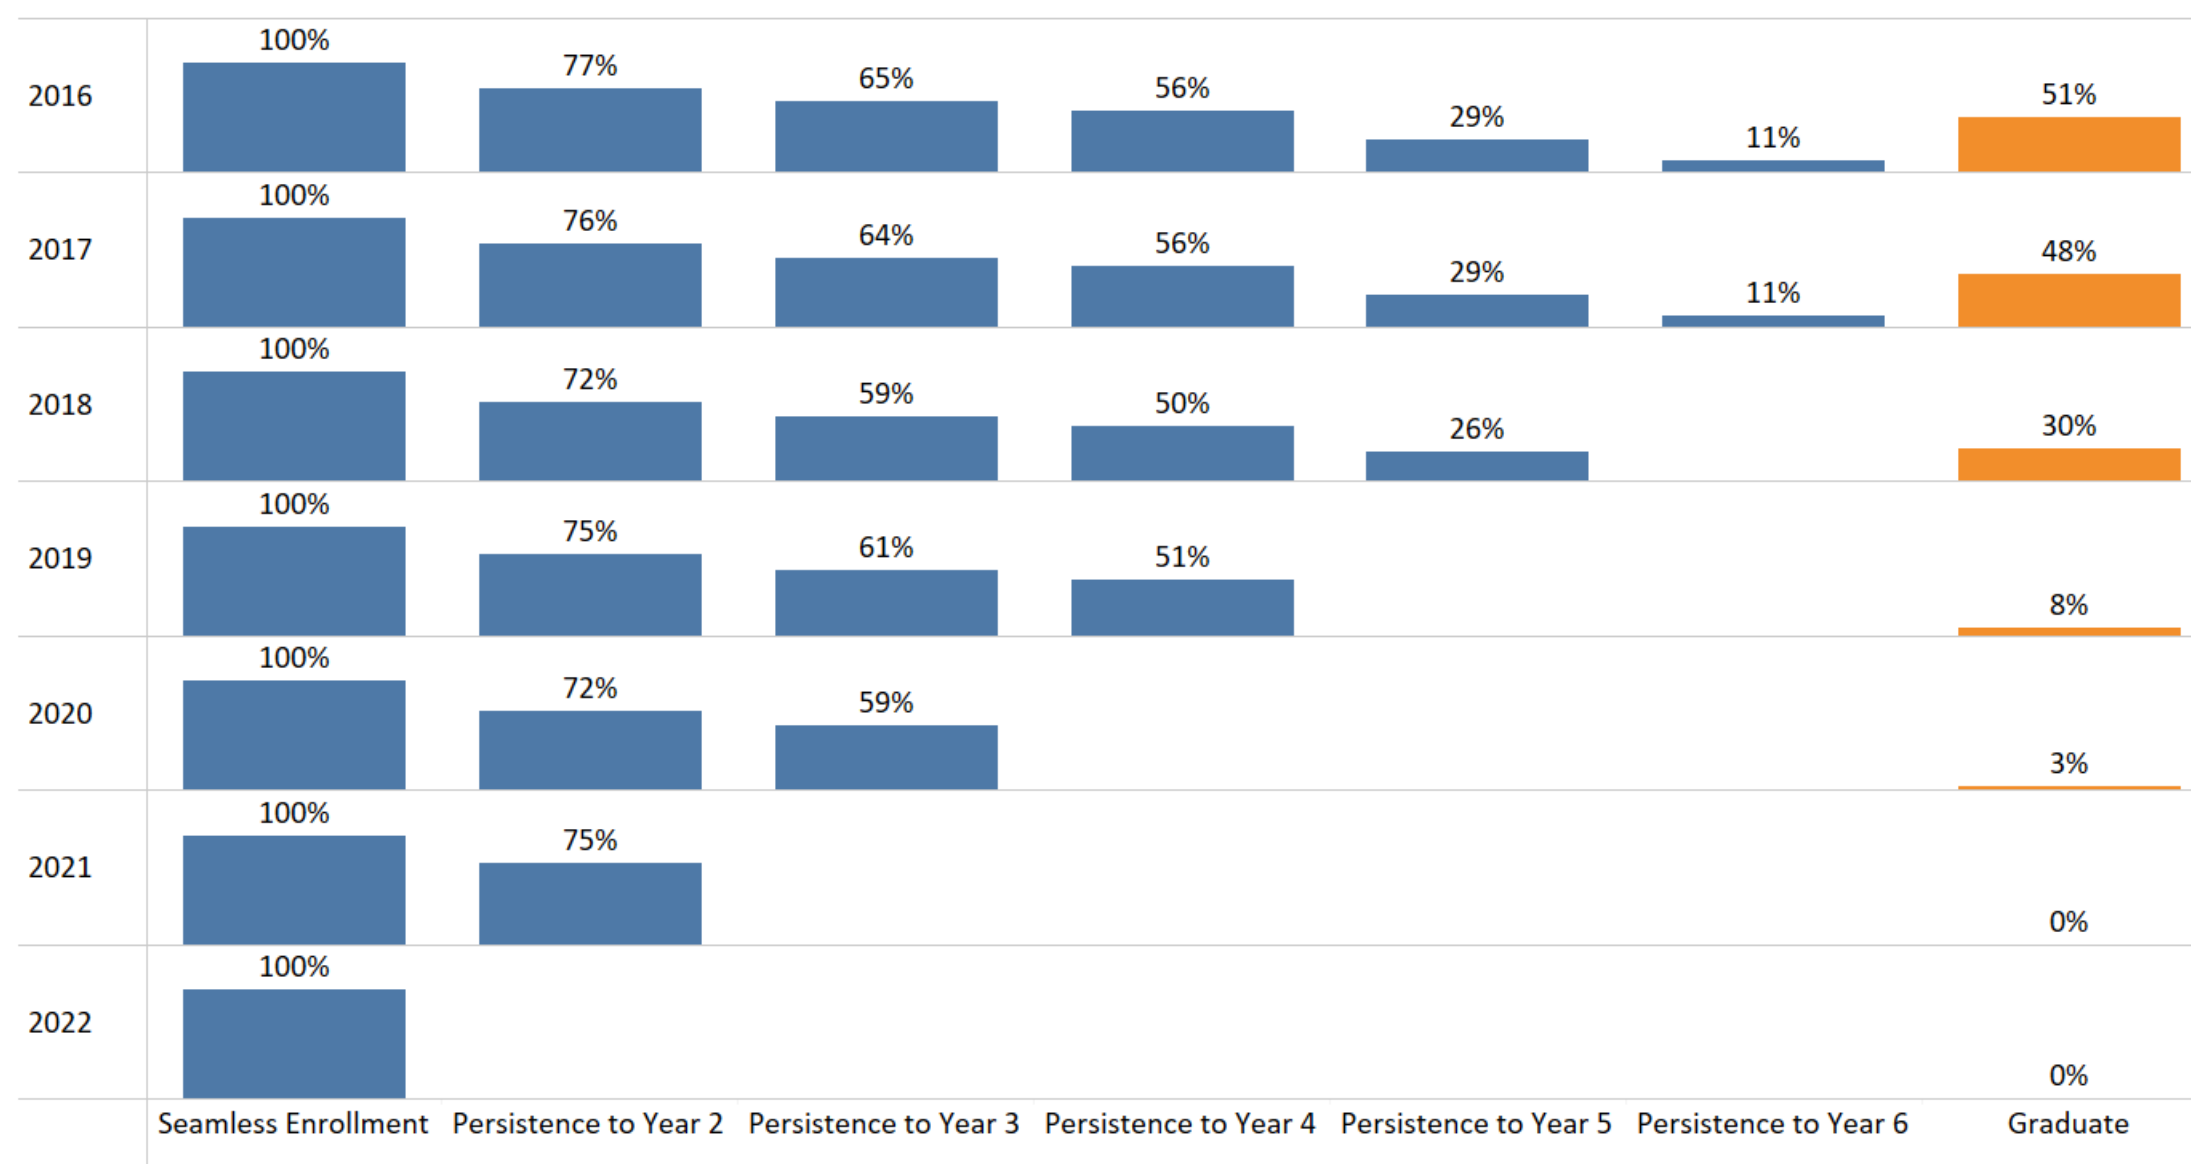

Note. Percentages were rounded to the nearest whole number; the 0% in the Graduate column refers to a percentage rounded down to 0%.

## 51% of cohort 2016 on-time graduates who seamlessly enrolled earned some kind of degree within 6 years

National measures of persistence and college graduation rates typically consider the percentage of *enrollees* who persist and graduate. Of APS students who seamlessly enroll in college, about three out of four persist to year 2. Cohort 2016 is the only cohort represented in the graph in which its members have had six complete school years since high school graduation to earn a postsecondary credential. In this graph, the percentage of students who persisted in each year and graduate only includes students who seamlessly enrolled. Students may count in both persistence and graduate figures. Nationally, the 6-year graduation rate for students who entered college in the fall of 2016 was 62.3% (Source: [Completing College](#)).

Persistence of APS Seamless Enrollees

Note. Percentages were rounded to the nearest whole number; the 0% in the Graduate column refers to a percentage rounded down to 0%.

Many APS students enroll at institutions with graduation rates below national averages for students who entered college in the Fall of 2016 (77.8% for 4-year private non-profit, 68.0% for 4-year public, and 43.1% for 2-year public) ([Completing College](#)).

### Graduation Rate by First Institution

	Predominant Degree Type	APS Cohort 2016 Students	APS Grad Rate (Any)	APS Grad Rate (Same)	Institution Grad Rate
GEORGIA STATE UNIVERSITY	4-year	83	60%	55%	54%

CLARK ATLANTA UNIVERSITY	4-year	20	30%	25%	43%
MILES COLLEGE	4-year	19	32%	32%	24%
GEORGIA GWINNETT COLLEGE	4-year	17	18%	0%	19%
VALDOSTA STATE UNIVERSITY	4-year	15	67%	67%	40%

#### Graduation Rate Legend

This table shows institutional and APS graduation rates for schools that enrolled at least 15 APS on-time graduates from cohort 2016 (i.e., students have had 6 years to graduate).

- The “Any” rate indicates students who earned a degree/certificate from any institution within 6 years.
- The “Same” rate indicates students who earned a degree/certificate from the same institution at which they started (the definition used for the institutional graduation rate).
- For both APS graduation rates, the denominator is the number of cohort 2016 seamless enrollees who were full-time students during their first semester.
- APS students at 2-year colleges were given six years to graduate. For this reason, a direct comparison between APS Grad Rate (Same) and Institution Grad Rate (three years to graduate for 2-year institutions) is ill-advised for 2-year institutions.

APS students who attend postsecondary institutions with low graduation rates may require additional supports to be successful.

*Note: Atlanta Metropolitan State College and Albany State University offer 4-year degrees.*

#### Notes:

- Institution graduation rates come from the Department of Education’s [College Scorecard](#) and are the percent of students who enrolled in the fall as first-time, full-time students and completed within 150 percent of the expected time. To reduce variability from year to year, graduation rates are averaged across years. The institution graduation rates reflect cohort 2014 high school graduates and not cohort 2016 high school graduates (a two-year lag time is present).
- Students who transfer out do count against an institution’s graduation rate.
- Percentages were rounded to the nearest whole number.
- Completion rates from [Completing College](#) include both full-time and part-time, first-time students who completed in six years.

## Data Sources

### National Student Clearinghouse

Postsecondary enrollment rates are calculated using data provided by the National Student Clearinghouse (NSC). NSC is a subscription service used by APS to match graduates with college enrollment records. NSC obtains student data directly from participating college and university registrars typically on a monthly basis. NSC provides information for more than 3,600 U.S. postsecondary institutions. Postsecondary institutions that do not participate with NSC include four of the U.S. service academies (the United States Naval Academy has been a participant since August 2020).

There are several limitations to matching and reporting of enrollment data which may result in underreporting of college enrollment. Limitations such as name variations, name changes, and FERPA blocks may result in lower levels of matching. According to NSC, Georgia has a [FERPA block rate](#) of approximately 1%.

### College Graduation Rates

Institution graduation rates come from the Department of Education's [College Scorecard](#). National college graduation rates come from the NSC's [Completing College National and State Reports](#).
