Upcoming Activities

- Main level east slab on grade pour
- Complete exterior skin mock up
- Continue main level east underground MEP
- Commence erecting sequence 3 steel
- Continue lower level block walls

Financial & Schedule Status

Current GMP = \$27.6M
Bill to Date = \$5,197,152

Start Date: July 2, 2018
Current Completion Date:
July 10, 2019

Project Overview

Photo of the project site with simultaneous concrete pour and steel install

Safety Sector

“Silica Exposure”

OSHA standards require controls to minimize exposure to silica dust be implemented any time concrete/masonry/stone cutting takes place. Finishing trade partners utilized a mixture of wet cutting and vacuum attachments to control the resulting dust during slab cutting.

Transfer truss spanning gym installed

Bar joists installed over cafeteria

Iron workers installing sequence 1 & 2 steel

Main level west slab on grade poured

Sanitary lines for main level east installed
